

# BData Standards

## IDs

Following PTR's concept, if the B3D mod structure would allow me to, I would like to make assets separate from the worldbuilding aspect - so, make separate mod for resources and separate for landmass and quests.

This is more helpful in case of MW (where sadly it doesn't apply) because of only one worldspace, but it is (imo) quite tidy format for that in general.

B3D would follow this pattern:

### General prefix: B\_

#### Cultures

- ★ **Com** - just like in TData, everything common to all cultures (should be much less than in MW though)
- ★ **Bae** - baedoorian
- ★ **Mes** - mesinpean
- ★ **Jit** - jitadian
- ★ **Ans** - ansurian
- ★ **Erd** - erdic
- ★ **Gob** - goblin
- ★ **Keh** - kehtic
- ★ **Kae** - kaerians
- ★ **Kai** - kaikhi
- ★ **Omt** - ormath
- ★ **TSh** - saphtric
- ★ **TPh** - pahtric
- ★ **TVi** - voitric
- ★ **Lak** - latoka

#### Countries / Areas

- ★ **GlB** - counts for all areas
- ★ **BaE** - Baedoor (East)
- ★ **BaW** - Baedoor (West)
- ★ **KeG** - Kaer (whole)
- ★ **KeS** - Kaer (Southern Coast)
- ★ **Kha** - Khacari

★ **Ans** - Ansur

### Regions

- ★ **Gl** - counts for all areas
- ★ [sea around Khacari]
- ★ **Enn** - Ennaeric ocean
- ★ **Neg** - Negeai ocean

IDs should be more *descriptive* from PTRs, but still try to be concise. If there's a feature of the object that makes it distinct, e.g. colour, the ID should refrain from making variants numbered (01, 02, 03) and instead use the characteristic - numbers will follow if there are multiple entries within this feature. See WanderingIterator's call for coral ID changes:

| <u>Original IDs</u>      | <u>Edited IDs</u>          |
|--------------------------|----------------------------|
| T_Po_Fauna_Coral01_01    | T_Po_Fauna_CoralSpotty     |

| T_Po_Fauna_CoralGrp02_04 | T_Po_Fauna_CoralTanGrp_04  |

And here are ID guidelines, just so it's easier to follow it:

| ID Guidelines |                                                                                                                                                                                                                                                                                                                                                        |

| Legend      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|       |                                                                                                                                                                                |
|-------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| *     | You can combine multiple options; while doing so, it needs to follow order from the list (if list is not provided, then it goes alphabetically); please avoid if not necessary |
| [...] | Indicates optional part of the ID                                                                                                                                              |
| _Var  | Should either be a characteristic, or a number (or both, see beginning of this subsection)                                                                                     |

## Files

Files should all be under **bae** folder for FSAM, so that they are set in one place. B3D will separate them more, but there's no need for it now.

That, however, raises a need for separating assets per culture on a file name basis. Therefore a file should follow below system:

- [culture]\_[object]\_[variant][number] – for misc items
  - **bae\_coin\_funt01.nif**
  - **bae\_ironware\_plate01.nif**
- ing\_[object]\_[variant][number] – for ingredients
  - e.g. **ing\_bread\_erd01.nif**

Folder-wise, the *meshes* system of TData is followed: meaning most textures and icons are more separated than originally

- **m** – miscs
- **n** – ingredients

## Leveled Lists

Guidelines for leveled lists:

- food should be region-specific
  - Food is used only to collect all common foods that are found in whole province, but not used for containers; also regions will use the pan-provincial list to all get the shared list
  - smaller lists (such as fruits, meats, fishes etc.) should probably have shared prefixes? so it's like *foodFish*,

*foodMeat*, *foodREGION* (so it's easier to find them all nearby)

- it may make sense to discuss whether food regions shouldn't be broader than ingredient ones - it should depend on lore and region density in area (ingredients however should be fully regional, and just share some of the ingredients from nearby areas if it makes sense - but this should be individually decided)
- ingredients should be **even more** region-specific
  - for exports, there should be leveled list that is called *IngrExport*, instead of *Ingr* (for clarity of use)
- clothes should be tier-specific and type-specific (each type leveled list should be nested in general clothes leveled list); gender-specific too?
  - if we were to specify "region" usage (Colovian/Nibenese) these imo should be part of culture key/separation? but also see Nib rings and clothing etc.
- *Bath* leveled list consisting of soaps, brushes and other stuffs like that (used e.g. for small chests found in bathrooms)

# Tableware

Tableware tiers for  
Important to mention that tablewares in B3D should include their own cutlery (except for the highest one).

Erdic

|                                       |                                    |

| Middle Class    |        |
| Lower Class     |        |

## Ormathian

Ormaths could have less tableware, as there's no reason they would produce much. I think YNPTUTC and VR tiers can be omitted too, and general stratification could be brainstormed (would tiers even make sense in their society?)

|                 |           |
|-----------------|-----------|
| Universal Class | Stoneware |
|-----------------|-----------|

# Assets

Please refer to the [asset browser](#).

If you'd like to work on an asset, please make a suggestion on [this spreadsheet](#).

After the claim request is reviewed, you will be granted it and the browser will be updated respectively.

# Professions

🔥 means profession having house sign

### General (Morrowind) professions:

- Alchemist 🔥
- Apothecary 🔥
- Armorer 🔥
- Baker 🔥
- Bookseller 🔥
- Enchanter 🔥
- Healer 🔥
- Mage 🔥
- Pawnbroker 🔥
- Priest 🔥
- Publican (inn) 🔥
- Tailor 🔥
- Trader (general goods) 🔥
- Weaponer 🔥
- Fletcher 🔥

### B3D-specific professions:

- Carpenter 🔥 (furniture)
- Grocer 🔥 (?)

### B3D-specific buildings:

- Bank 🔥
- Theatre 🔥
- Post Office 🔥
- Printer 🔥

### Rarer professions:

- Barrister
- Guild of Mages and Guild of Fighters, the two nearly-universal guilds
- Generic Tavern 🔥

# Dungeons

The list below is to enlist dungeons covering particular development areas.

Inspired by similar graph made for PTR:

| Morrowind                        | Cyrodill         | Skyrim       | Hammerfell   | High Rock     |
|----------------------------------|------------------|--------------|--------------|---------------|
| Cave / Grotto / Shipwreck / Mine |                  |              |              |               |
| Ancestral Tombs                  | Colovian Crypt   |              |              | Breton Crypt  |
|                                  | Colovian Barrow  | Nord Barrow  | Nede Ruin    |               |
| Velothei Tower                   |                  |              |              |               |
| Skyrender Hive                   |                  |              |              |               |
| Dreugh Hive                      |                  |              |              |               |
| Dunmer Stronghold                | Reman Ruin       | Nord Fort    | Ra'Gada Ruin | Breton Castle |
| Dwemer Ruin                      | [Marukhati Ruin] |              | Rourken Ruin | Warp Ruin     |
| Daedric Shrine                   | Ayleid Ruin      | Direnni Ruin | Crypt / Hall | Direnni Ruin  |

B3D doesn't need to follow neither PTR/Morrowind dungeon counts, nor follow its own amounts equally.

## Disane

- **Soft**
- **Intermediate**
  - Sain Ruins
  - Bandits
- **Difficult**
- **Extreme**

## Kacari

- **Soft**
- **Intermediate**
  - Sain Ruins
  - Bandits
- **Difficult**

## Baedor

- **Soft**

- **Intermediate**
- **Difficult**
  - City Sewers
    - Bandits
    - Rats
- **Extreme**

## Kaer

- **Soft**
- **Intermediate**
  - Kehtic Fort Ruin
    - Bandits
  - Erdic Fort Ruin
    - Bandits
- **Difficult**
  - Sain Ruin
    - Undead Sain guardians
    - Bandits (if empty ruin)
  - Talaaxi Ruins
    - Possessed Talaaxi
    - Bandits (if empty ruin)
- **Extreme**
  - Underground Sanctuaries
    - Cultists

PoIs

Points of Interests that would span across lands for each area.

### Kacari

| Icon | Name      | Description                                |
|------|-----------|--------------------------------------------|
|      | Sain Ruin | Ruins of fortifications built by Sain clan |
|      |           |                                            |
|      |           |                                            |
|      |           |                                            |

### Kaer

| Icon                                                                               | Name             | Description                                |
|------------------------------------------------------------------------------------|------------------|--------------------------------------------|
|                                                                                    | Sain Ruin        | Ruins of fortifications built by Sain clan |
|  | Talaaxi Ruin     | Ruins of town or forts of Talaaxi apes     |
|                                                                                    | Kehtic Fort Ruin | Kehtic Fort, but ruined                    |
|                                                                                    | Erdic Fort Ruin  | Erdic Fort, but ruined                     |
|                                                                                    | Goblin Camp      |                                            |

### Baedoor

| Icon | Name | Description |
|------|------|-------------|
|      |      |             |
|      |      |             |
|      |      |             |
|      |      |             |

# Organisation Structure

**History/context:** Baedoor was for a long time an idea I was working on alone, meant to be a project carrying my own vision over the entirety of this universe. I was very sceptical towards any interference from anyone, and kept the worldbuilding almost entirely clear of those.

This changed slightly with getting to know my beloved MCreator/LCC crew. It opened me to the tiny influences that were either cameos (Sajevius dragon in ghloddish cave) or taking various ideas into the lore (Hamza brought me the idea of tortoise tank, for example).

I was always willing for people to help me with my work, but for a long time the amount of creative power I wanted them to have was meant to be minimal. Now, with my PTR work, this also kinda changed - though the context of the above is crucial to understand that my need for control is still relevant.

**Current format:** Everyone can join the project and contribute to it, under the terms that everything contributed by them is indefinitely owned by me to be used in worldbuilding context (see more in [here](#)).

I would like the team structure to be fairly equal and democratised - keeping the idea of seniors to be mostly more experienced and/or skilled and leads to be inspiring figures instead of someone to blindly obey.

Everyone should be able to chime in with new ideas and if they want to put time and effort into making either design or implementation, to be able to introduce something new to the lore. Implementers should also have fairly big freedom in their domain, with the caveat that worldbuilding and design should be the first priorities.

This will of course depend on the topic (for example a new isolated faction is much easier than a lorebreaking event) but that's the general premise.

Every branch worked on for B3D would be managed by lead(s), to ensure consistent vision on the area and someone to be able to break the impasse. **By default, all branches' lead will be me.**

Any other lead role will be given to only most trustful devs interested in working on a particular area and having strong, interesting yet faithful vision on it.

However to avoid the powertripping issue, this dev will also need to be particularly open to teamwork and hearing other voices - so both qualities are necessary for this to be a possibility. If lead's work or behaviour starts being unhealthy, I will be able to authoritatively strip the title from them to ensure good culture among developers.

No matter if the branch will have a lead or not, I will be overseeing all of them, albeit focusing on those that I personally navigate towards.

This overview will allow me to control the holistic, most general creative direction, leaving details more up to discussion and brainstorming.

# Region Guides

## Disane

A small group of islands located south-west of Kacari. It provides a lush, dense forest region that gets a little bit warmer than its northern counterpart, but still retains most of its features.

[Description for the region]

Disane region is WIP. The list below is under construction and is primarily worked as a way for exterior prototyping (including using assets that are destined for replacement with native BData variants).

## Exterior Guide

[Ref limit: to be decided, but should be freer than PTR

performance-wise and follow more-less Orethan's example]

[Insert description of what the region should look like ingame.

What characterises the exteriors, are they sparse or lush, what's the climate here, is the landscape marked by drainage ditches or meltwater streams or floodplains etc]

## Vertex Colouring

Under statics: ?

Between textures: ?

[Vcol values for: between land textures, under statics, shoreline. If necessary: between underwater textures/under underwater statics / notes where to *not* shade]

## Ground Textures

[Make a bullet list of all the texture IDs here, and feel free to describe each of them if they have specific use cases. i think its good form to write small descs even for no brainers like dirtroad, just for the sake of minimal confusion]

## Terrain

[Usually just contains rocks, but bullet list of all statics that are part of the landscape such as rocks, cliffs, giant bone formations, crystals]

## **Static Flora/Trees**

[Self explanatory, bullet list of all static flora in the region, such as trees, bushes etc. (static fauna and fungi such as corals or giant mushrooms go here too naturally. Ideally describe some usage guidelines for each, can be very broad]

## **Container Flora**

[All containers placed in the landscape. Again unusual container stuff like termite mounds would also go here along with yk. flowers and mushrooms. Here it is pretty crucial to at least describe how rare each one should be, and ideally also some more specific usage guidelines such as "near water" or "on rocks". It's a fine line between allowing for some interpretation and not having any guidelines at all tho]

## **Cultivated Flora (Near Settlements)**

[Similar to containers, but all the stuff that would be found in farms and fields and gardens. (Gardens can be a bit more lax tho imo, so focus on the stuff that is grown in the soil of the region.) Can overlap heavily with container flora but usually has some unique ones, like if wheat or corn doesn't grow in the wild]

## **Water Flora**

[Should not be separate section, but just reminder to include water flora in both flora sections]

## **Creatures**

[Not in PT region guides as far as i remember but is honestly super useful, especially since i think we should move more towards exters placing creatures as part of their claims. When I make a list like this i differentiate between passive creatures, hostile creatures and domesticated creatures]

# **Interior Guide**

## **Cave Flora**

# Interior Guides

## **Erdic Common**

[pending]

## **Erdic Rural**

[pending]

## **Erdic Temple**

[pending]

## **Notes**

Note for interior guides of the future, brought by our dear @ashtom on PT (with me expanding on the idea, just because FSAM/B3D has a privilege of establishing standards early and have no backlog of reintroducing it to huge landmass).

For interiors close to water, subtle water sounds would be good to use. I imagine this could extend to other things, like e.g. bird sounds if the house is inside a forest or something like that. Just be more thoughtful about the ext environment than just calculating northmarker, as this was always somewhat of a painpoint of intdev standards.

I wonder if there could be a way for sound to e.g. be modified to only emit itself during certain parts of day. When we get to engine creation this would be good to include natively, but maybe it is possible to include script in Morrowind as well.

Also, one of enforcements of mine is that all interiors (including P at least for erds, to emphasize their living standards) should have space for a bath - it should be treated similar to bed, as a necessity. It can exist in the simplest way of having a half-barrel. In the case of an area having a bathhouse, this requirement can be skipped in some areas nearby.

# Book Guides

The list below notes all books in BData, alongside their supposed rarity and use case. Please keep the list alphabetical.

| Book ID | Book Title | Rarity | Use case |
|---------|------------|--------|----------|
| ...     | ...        | ...    | ...      |
